-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1644

1. Claims 4, 6, 12-21, 23 and 27-29 are pending.
2. All previous rejections have been overcome, a new ground of rejection and a Non-final office action is set forth below.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 4, 6, 12-21, 23 and 27-29 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for treating a reproductive disease that is related to egg laying or fertilization, does not reasonably provide enablement for treating neoplasia of the reproductive tract or cystic hyperplasia. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

It is well established that the cause of cancers is uncontrolled cell growth that escapes immune system regulation, see Kubly et al. (enclosed). Applicant's invention is drawn to administering a zona pellucida protein to help treat fertility and reproductive associated with egg laying in birds. The administration of said zona pellucida protein, elicits antibodies against the zona pellucida present on ova in the hens. When the antibodies bind to the zona pellucida proteins they sterically hinder the ability of sperm from male chickens to fertilize the hen ova. It is reasonable to control fertility in these hens with such a treatment. However the ability to treat or prevent cancers in these Hens has no sound scientific basis. The specification provides no link between fertility and cancer, and it has not been recognized by science that preventing fertility would help treat cancers of the reproductive tract or cystic hyperplasia. In light of the lack of working examples or guidance as to how to practice the claimed invention to treat cancers by inhibiting fertilization, it would be unpredictable and require an undue amount of experimentation in light of the state of cancer, to practice the full scope of applicant's claimed invention.
